## Materials:

## Game Board

One die
Twenty Counters

## Make 10 Directions:

Version 1: Player 1 rolls a die and puts that number of counters on his/her board. Player 1 then says how many more he/she needs to make ten. Player 2 then rolls and places counters on his/her board and says how many more he/she needs to make 10. Play continues until the first player reaches EXACTLY 10.

Version 2: Player 1 and Player 2 places 10 counters on his/her board. Player one rolls a die and takes off that many counters from his/her board. Player 1 then says how many more he/she needs to subtract to have zero. Player 2 then takes his/her turn. The first player to get to EXACTLY zero and clear his/her board is the winner.
